Italian scaleup TeamDev joins EIT Digital Accelerator

Trento, 11th January 2017

Italian scaleup, TeamDev, the developper of 'WiseTown' a big data analytics platform for local governments, has joined the EIT Digital Accelerator to assist their plans for growth and to gain access to new European markets.

Founded in 2008, TeamDev is a dynamic Italian ICY SME with a strong focus on technological innovation and system integrations. The scaleup has strong experience in geographical environmental sciences, agriculture and smart cities. They have just developed a big data analytics platform for the public administration sector called WiseTown.

This smart city product is a B2B solution integrated with Fiware that collects information from different data streams to identify the issues that affect cities in several areas: urban renewal, refuse collection, public safety, transportation, social services and environmental issues.

They have now joined the EIT Digital Accelerator to help them increase their access to market locally in Italy but also throughout Europe in countries including Spain, France, Germany and the Netherlands. They are also expecting to grow their workforce making use of the access to talent that the EIT Digital Accelerator provides.

TEAMDEV will also join the EIT Digital Cities Action Line which leverages the digital transformation of cities through centralised, participative and collaborative interactions between city actors: government, city service providers, industry, and citizens. This

transformation enables the deployment of disruptive information, mobility and safety services in cities.

By joining the EIT Digital Accelerator, TEAMDEV will benefit from expert support that will not only help them accelerate their growth by gaining new customers in Italy and across Europe, but also reach new talents via EIT Digital Access to market programme.

Head of EIT Digital Accelerator Dolf Wittkamper said: "We are very pleased to welcome TeamDev to the Accelerator. They have developed a really innovative product that can adapt to any public administration setting and therefore has a Europe-wide application. We love the idea that they don't want to focus only on big cities but also on smaller towns as well. It's completely in line with our motto at EIT Digital of *driving Europe's digital transformation*".

Andrea Cruciani, CEO and founder of TeamDev said: *"We are excited to be joining the EIT Digital Accelerator to develop our market. Our revenue was some 950K€ in 2016 - we expect to increase 50% turnover for 2017 and to be able to reach other countries like Spain, Netherlands, France or Germany. We are also planning to grow our team and aim to have a minimum of eight new recruits in 2017 with the help of EIT Digital Accelerator."*

About TeamDev

TeamDev s.r.l. is a software house based in Perugia operating both locally and and internationally providing:

- Development of Geographic Information Systems;
- Multi-device application procedures;
- Specialised Consulting services;
- Technology and innovation consulting;
- Training courses for companies and developers.

TeamDev meets the requirements of companies, public administrations and Non-Profit organisations needing to embed technology innovations into their processes. We are developing framework and software products that include geographic information systems (GIS) for web and mobile application solutions. We also offer specialised consulting and training to developers and companies.

TeamDev works with companies operating in Italy and abroad. During the years we have been actively involved into the world of innovation, we have acquired clients ranging from PMI, PA,

big industrial and editorial groups to various academic, voluntary associations and organisations.

About EIT Digital

EIT Digital is a leading European open innovation organisation. Our mission is to foster digital technology innovation and entrepreneurial talent for economic growth and quality of life in Europe. We bring together entrepreneurs from a partnership of over 130 top European corporations, SMEs, start-ups, universities and research institutes.

EIT Digital invests in strategic areas to accelerate the market uptake of research-based digital technologies and to bring entrepreneurial talent and leadership to Europe. Our innovation and education activities are organised in and around our co-location centres, where students, researchers, engineers, business developers and entrepreneurs come together to drive the digitalisation of society.

EIT Digital is a Knowledge and Innovation Community of the European Institute of Innovation and Technology (EIT). Since 2010, EIT Digital has consistently mobilised talent, ideas, technologies, investments and business across Europe and beyond to stimulate disruptive digital innovation. EIT Digital headquarters are in Brussels with co-location centres in Berlin, Budapest, Eindhoven, Helsinki, London, Madrid, Paris, Stockholm, Trento and a hub in Silicon Valley.
